

BHUMI AI — INVESTOR PITCH DECK

India's First AI-Powered Rural Intelligence & Farmer Empowerment Platform

SLIDE 1: THE HOOK (Title Slide)

BHUMI AI

"Bridging the Gap Between Government Schemes and 150 Million Farmers"

- AI-Powered | Multilingual | Voice-First
- Built for Bharat, Not Just India

SLIDE 2: DEEP DIVE INTO THE PROBLEM ●

[!IMPORTANT]

The Systemic Failure: Why ₹15,000+ Crore Stays Unclaimed

We aren't just solving a "registration" problem; we are solving a **systemic infrastructure collapse** in rural India.

1. The Literacy & UI Barrier (The Digital Divide):

- Most government portals are desktop-first and English-centric.
- 90% of our target farmers have never used a PC; they are smartphone-only users.
- Complex dropdowns and jargon-filled forms (in English/Standard Hindi) are effectively **invisible** to a farmer speaking a local dialect.

2. The "Shadow" Middleman Economy (The Trust Gap):

SLIDE 3: SOLVING THE "CONNECTION CRISIS"

Bhumi AI is the Bridge: Connecting Assets, Identity, and Intel.

Feature / Solution	Pain Point Solved	The "Aha!" Moment
 Multi-Dialect Voice AI	Low Literacy / UI Friction	A farmer speaks in Telugu; the AI handles the complex backend navigation and gives a voice response. 0% typing required.
 AI Vision Doc Verifier	Fraud & Approval Lag	We use Llama 3.2 Vision to scan land records. It flags 99% of fakes instantly. Reduces verification time from months to seconds.
 Personalized Advisor	Information Overload	Our AI cross-references the farmer's actual GPS-linked land data with every live scheme database to provide a "Curated Opportunity List"

SLIDE 4: PRODUCT DEMO SCREENSHOTS

Show live demo of:

1. **Homepage** — Premium glassmorphism UI
2. **AI Chatbot** — Ask in Hindi, get instant AI response
3. **Voice Input** — Click mic, speak, see transcription
4. **Hindi Keyboard** — Pop-up virtual keyboard
5. **Dashboard** — Geographic activity map of India
6. **Subsidy Calculator** — Dynamic results
7. **Marketplace** — Machinery, fertilizer, loans

SLIDE 5: WHY NOW? 🕒

- India Stack is ready — UPI, Aadhaar, DigiLocker make digital distribution possible
- AI costs dropped 90% — Groq LPU makes AI inference 10x faster and cheaper
- Government pushing Digital India — ₹1.2 lakh crore budget for digital rural programs
- Smartphone penetration in rural India crossed 65% in 2024
- PM-KISAN alone has 11 crore+ beneficiaries — massive TAM
- No dominant player in AI-powered agricultural advisory space

SLIDE 6: MARKET OPPORTUNITY

Total Addressable Market

Metric	Value
Small/Marginal Farmers in India	150 million+
Annual Government Scheme Budget	₹2.5 lakh crore
Agri-Tech Market (India, 2025)	\$24 billion
Agri Marketplace (India)	\$8 billion
Crop Insurance Market	₹25,000 crore
Farm Equipment Rental	\$3 billion

Our Serviceable Market (Year 1)

- **Target:** Maharashtra, Telangana, Tamil Nadu

SLIDE 7: OUR USP / COMPETITIVE EDGE

[!TIP]

 Why Bhumi AI Wins: **10x Faster AI** Built for Bharat

Feature	Bhumi AI	KisanHub	DeHaat	AgroStar
AI Chatbot	✓ Groq LPU	✗	✗	✗
Voice Input	✓ 4 Languages	✗	✗	✗
Hindi Keyboard	✓ Built-in	✗	✗	✗
Fake Doc Detection	✓ AI Vision	✗	✗	✗
Subsidy Calculator	✓ Dynamic	✗	✗	✗
Full Marketplace	✓ 6 Categories	✗	✓	✓
Geographic Intelligence	✓ Live Map	✓	✗	✗

SLIDE 8: TECHNOLOGY STACK

Architecture

FRONTEND (React + TypeScript) Glassmorphism UI Framer Motion Animations Virtual Keyboard Web Speech API (Voice)	
BACKEND (Node.js + Express) JWT Auth RESTful APIs PostgreSQL DB	
AI SERVICE (Python + Flask) Groq LPU Llama 3.3 (Chat) Llama 3.2 Vision (Fraud Detection) Multilingual NLP	
INFRASTRUCTURE Docker PostgreSQL React Simple Maps	

Why This Stack?

SLIDE 9: BUSINESS MODEL

Revenue Streams

Stream	Model	Projected Revenue
Marketplace Commission	5-8% on every transaction (machinery, fertilizer, equipment)	₹20 crore/yr
Premium AI Advisory	₹99/month subscription for personalized scheme tracking	₹15 crore/yr
Insurance Partnerships	Lead generation fee per policy sold	₹8 crore/yr
Loan Facilitation	Commission on loan disbursements	₹5 crore/yr
Government B2G	SaaS licensing to state agricultural	₹10 crore/yr

SLIDE 10: TRACTION & MILESTONES

What We've Built (Current Status)

-  Full-stack platform with 15+ pages
-  AI Chatbot powered by Groq Llama 3.3
-  Voice input in 4 Indian languages
-  Virtual Hindi keyboard
-  AI-powered fake document detection
-  Subsidy calculator with real scheme data
-  Marketplace with 6 categories (Machinery, Fertilizer, Equipment, Rentals, Loans, Insurance)
-  Geographic intelligence dashboard
-  User authentication & land registration

SLIDE 11: GO-TO-MARKET STRATEGY

Phase 1: Ground Zero (Month 1-3)

- Partner with Krishi Vigyan Kendras (KVKs) in Maharashtra
- Deploy at 500 Common Service Centers (CSCs)
- On-ground field officers demonstrate voice AI to farmers

Phase 2: Viral Growth (Month 4-8)

- WhatsApp Bot — farmers share scheme info via WhatsApp
- Referral Program — ₹50 credit for every farmer referred
- YouTube/Instagram Reels in regional languages

Phase 3: Scale (Month 9-12)

- State Government Partnerships — white-label for agricultural departments

SLIDE 12: TEAM

Add your team details here:

- **Founder/CEO** — [Your Name] — Background, passion for rural tech
- **CTO** — Technical lead, full-stack + AI expertise
- **Advisors** — Agriculture experts, government relations

SLIDE 13: THE ASK 🙏

Seed Round: ₹2 Crore

Use of Funds	Allocation
Product Development (Mobile App + Offline Mode)	40%
Go-to-Market & Field Operations	30%
Team Expansion (Engineers + Field Officers)	20%
Infrastructure & AI Costs	10%

What Investors Get

- Equity stake in India's first **Voice-First AI Agricultural Platform**
- Access to **150 million farmer** market
- **24x LTV:CAC** unit economics

SLIDE 14: VISION

"We are building the Google for Indian farmers."

- Year 1: 5 million farmers across 3 states
- Year 3: 25 million farmers, pan-India coverage
- Year 5: Southeast Asia expansion (Vietnam, Indonesia, Philippines)

Impact Metrics

- ₹5,000 crore in unclaimed subsidies unlocked for farmers
- 50 lakh fake document frauds prevented
- 2 crore farmers making data-driven decisions
- 30% increase in average farmer income through scheme awareness

QUICK SPEAKING NOTES (Read These While Presenting)

Opening (45 seconds)

"Good morning. We are here to talk about a paradox. India is a global leader in Digital Stack, yet 80% of our 150 million farmers are trapped in a pre-digital era when it comes to government support. They are losing money they are entitled to—over 15,000 crore annually—not because the money isn't there, but because they can't access the pipe. We are building Bhumi AI to be that bridge."

Problem: The Systemic Failure (90 seconds)

"When you look at the rural landscape, you see a 'Last Mile' crisis. Government portals are desktop-first and English-centric, while farmers are mobile-first and regional-only. This complexity has created a predatory 'Middleman Economy' where agents siphon off 20-30% of a farmer's subsidy as 'fees'. Moreover, our ground-level verification is broken—manual paper trails cause 6-month delays and a 15% fraud rate. Farmers don't need
